PROFESSIONAL SUMMARY

Unity Engineer and Game Developer with 2+ years of professional experience developing interactive experiences, games, simulations, multiplayer systems, XR/VR applications, real-time 3D visualizations, and Unity Editor tools across PC, mobile, Meta Quest, and other platforms. Experienced across the full development lifecycle, including gameplay programming, system architecture, UI/UX integration, networking, backend integration, performance optimization, debugging, deployment, and live support. Strong proficiency in C# and Unity, with additional experience in C++, Unreal Engine 5, multiplayer frameworks, and technical training. Skilled at building scalable, performance-focused interactive experiences and collaborating across multidisciplinary teams. Seeking international opportunities in Unity development, game programming, simulation, real-time 3D, XR/VR, interactive media, or immersive technology.

CORE TECHNICAL SKILLS

Game Engines	Unity (URP, HDRP), Unreal Engine 5 (Blueprints, C++, UMG)
Languages	C# · C++ · Python · JavaScript / React · HTML · CSS
Multiplayer & Net	Mirror, Photon PUN / Fusion 2, PlayFab, Matchmaking, Dedicated Servers
XR / Immersive	XR Interaction Toolkit, Meta Quest, OpenXR
Architecture	SOLID, OOP, Design Patterns, ScriptableObjects, Event-Driven, Object Pooling, Addressables
AI & Vision	NavMesh, Gameplay AI, MediaPipe, MoveNet
Performance	Profiling, Draw-call reduction, Texture/Mesh optimization, ANR investigation
Editor & Tools	Unity Editor scripting, Custom inspectors, Automation, Batch processing
Mobile & LiveOps	Unity Ads, AdMob, Mediation, AppLovin MAX, IAP, Firebase
Creative & Others	Figma, Photoshop, Premiere Pro, Git / GitHub, Jira, Notion, Microsoft Office, Gen AI

PROFESSIONAL EXPERIENCE

Unity Developer

July 2024 – Present

Section Soft • Hybrid, Pakistan

- ◆ Develop and ship games, mobile applications, simulations, multiplayer systems, and XR experiences across PC, mobile, and Meta Quest using Unity, C#, Unreal Engine 5, and C++.
- ◆ Develop monetized, production-ready games and applications from scratch, covering architecture, gameplay systems, integrations, monetization, optimization, and deployment.
- ◆ Integrate technologies and services including AdMob, Ads Mediation, custom plugins, RCC, Addressables, PlayFab, Firebase, Mirror, Photon, and Fusion 2.
- ◆ Optimize applications for performance and stability by profiling CPU/GPU, memory, GC allocations, draw calls, and asset loading, while resolving ANR and crash issues.
- ◆ Collaborate with designers, artists, developers, and QA across multiple projects to deliver features and production-ready builds on schedule.

Unity Technical Trainer

Dec 2025 – Present

CEGA • Remote, Pakistan

- ◆ Train 50+ students in Unity, C#, OOP, game architecture, and professional workflows — from fundamentals through publishable projects.
- ◆ Conduct code reviews and architecture audits; guide students in applying SOLID principles, design patterns, and version-control best practices.

- ◆ Develop and deliver structured curriculum covering gameplay systems, editor scripting, mobile optimization, and deployment pipelines.
- Freelance

Independent • Upwork / Fiverr

- ◆ Develop custom Unity projects for international clients, including multiplayer games, XR prototypes, AI integrations, and real-time 3D applications.
 - ◆ Turn client requirements into practical and maintainable solutions, handling development from initial planning and implementation through testing and final delivery.

- Software Tester

uTest • Remote

- ◆ Performed functional and usability testing across mobile, desktop, and web applications; maintained a 5-star performance rating.
 - ◆ Documented defects with clear reproduction steps, evidence, and severity classifications, accelerating developer resolution cycles.

■ SELECTED PROJECTS

Lyndhurst Farm — Interactive 3D Property Visualizer

Unreal Engine 5 • C++

Built a high-fidelity interactive architectural visualization application from scratch in Unreal Engine 5. Developed the complete experience using C++, Blueprints, and UMG, featuring interactive plot selection, dynamic camera systems, 360° navigation, spline fly-throughs, floor-plan slicing, property galleries, and REST-based external presentation control. Delivered a polished real-time 3D solution for enterprise real-estate presentation.

Scene Optimizer Pro — Unity Asset Store Tool

Unity Editor • C#

Identified and solved a recurring Unity optimization problem by designing and developing a dedicated Editor tool for auditing scene memory, textures, meshes, UI assets, and performance. Built automated analysis and one-click batch-fix workflows, independently taking the product from concept to development, testing, publication, and ongoing maintenance on the Unity Asset Store.

Beat Saber VR Clone — Rhythm Game

Unity XR • Meta Quest

Built a complete VR rhythm-game from scratch for Meta Quest, integrating real-time audio analysis to synchronize gameplay, environmental lighting, VFX, and haptic feedback with music. Developed the complete XR interaction and gameplay systems, then tested and optimized the application on physical VR hardware for stable performance, responsive controls, and player comfort, minimizing motion sickness during extended gameplay.

Shadow Boxing — 1v1 Multiplayer Mobile Game

Unity • Mirror • PlayFab

Independently designed and developed a production-ready server-authoritative multiplayer Android shadow boxing game, building the complete networking architecture with Unity, Mirror, KCP Transport, and PlayFab. Successfully containerized and deployed a dedicated game server to PlayFab using Docker, enabling real players to connect, match, and play through a centralized authoritative server. Implemented RPC-driven gameplay validation, server-side logic, synchronized game states, matchmaking, character customization, leaderboards, and backend services, with the server acting as the authoritative source of truth for gameplay across connected clients.

■ EDUCATION

BS Computer Science — City University of Science and Information Technology, Peshawar

Graduated 2024

■ ADDITIONAL STRENGTHS

Agile / Scrum	Familiar with sprint planning, stand-ups, retrospectives, and Jira workflows.
Technical Mentoring	Proven experience training junior developers and students at scale.
Cross-Functional Collab	Works effectively with designers, artists, QA, and product managers.
Rapid Prototyping	Ability to build functional prototypes quickly to validate game-feel and mechanics.
Client Communication	Strong written and verbal communication; experienced with international remote clients.
